## PERSONAL PROJECTS

E commercial Website (03/2020 - 03/2020)

Type you

- I made an fully functional e-commercial website through which you sell shoes. Front end part of the website has been done using HTML and CSS and Back end part is done by using SQL and PHP.

Attendance Managment System (06/2019 - 07/2019)

- I made an simple application to take the attendance of the student. Main purpose to show the total attendance of the student and give feedback according to their attendance. We use basic things like java and Sqlite database to build this application.

Messaging app (07/2020 - 09/2020)

- Developing a normal messaging application using java and firebase

Step Counter App (12/2021 - 12/2021)

- Developed a fitness step counter app using java and firebase. It will help to detect your step and also calories during walking and the data will get store into database. And the foreground service also run behind background.
- Features: -notification, battery optimization

Audio Recording and Managing app (02/2021 - 02/2021)

- It is a audio recording management app from which you can manage your audio files over there which are store within the device and the cloud. It will show all the details of the file as well as the recording. In this app we have used android studio, firebase, java.
